

USER GUIDE

DEI REPORT

Diversity, Equity, and Inclusion analysis platform

What is DEI REPORT?

A web platform that generates automatic DEI (Diversity, Equity, and Inclusion) quality reports, analyzing code, documentation, and technical team activity on GitHub.

Run analysis

For an organization or specific repositories.

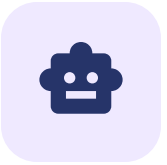

View metrics

Lexical diversity, inclusive language, tone, and Big Five.

Barrier-free access

Palettes and typographies adapted for everyone.

Smart Assistant

Chat with the AI to interpret your data and get personalized recommendations.

Getting Started (1/2)

1

Log in (optional)

Use the app as a guest or click "LOGIN". If you don't have an account, sign up right there.

2

Configure your analysis

Choose between an entire GitHub organization or a list of specific repositories.

3

Track progress

You will see real-time progress while the code and documentation are being processed.

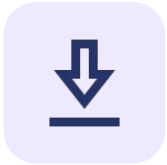

4

View the DEI report

Diversity metrics, inclusive language, code tone, and Big Five traits.

Getting Started (2/2)

5

Download the report

Generate a PDF that respects the currently active accessibility palette.

6

Review history

View, reopen, or delete previous analyses from "HISTORY".

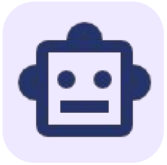

7

Accessibility

Dyslexia-friendly typography, bold text, font scaling, and adapted color palettes.

8

AI Assistant

Within each report, use the floating chat to resolve doubts, interpret metrics, or ask for improvement tips.

How to read the DEI report

Shannon Entropy

Lexical diversity in comments: the higher, the more varied.

Simpson Index

Probability of finding terms distinct from each other.

Inclusive language

Presence of inclusive language in code and documentation.

Code tone

Emotional tone detected in commits and comments.

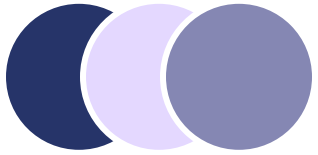

Big Five traits

Personality profile estimated from team communication.

Accessibility palettes

Available from the floating accessibility panel and also applied to the report PDF.

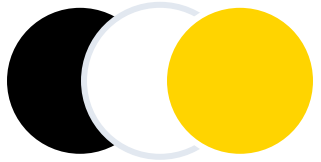

Original colors

Protanopia / Deuteranopia

Tritanopia

High contrast

Frequently asked questions (1/2)

?

Do I need to create an account?

No. You can run analyses as a guest in an anonymous session. If you register, your history will be associated with your user account.

?

How do I register?

Click "LOGIN" in the header and follow the link to create a new account from the form itself.

?

Full organization or repository list?

The organization analyzes all public repositories of an account. The list allows you to choose specific repositories.

Frequently asked questions (2/2)

Can I download the report as a PDF?
Yes, from the report or from the history, respecting the active accessibility palette.

How do I change colors or font size?
With the floating accessibility panel: dyslexia font, bold text, font scale, and color palette.

Can I delete an analysis from the history?
Yes, each analysis in the history has an option to delete it permanently.

What is the AI chat for?
The assistant (LLM) knows the context of your report. You can ask it for summaries of findings or concrete suggestions to improve team climate.
